

EPOH

The campus consists of older and dignified historic structures. The addition, combined with a new face on the existing structure, builds on the intrinsic attributes in more modern form of the traditional architecture by taking design cues from the old Fort Brady campus buildings. This brings a contemporary look, yet steeped with historic reference.

Lake Superior State University Crawford Hall Michigan USA

Consultant
Scope

EPOH inc. + gunn levine + ellerbe becket
Technology integration, Laboratory Consulting,
Interior Design and Contract Administration Services

Project Type

Post Secondary Teaching Facility, Laboratory, Planetarium, Museum

Project Size

128,000 sq. ft. (68,000sq.ft. new, 60,000sq.ft. renovated)

Client

Lake Superior State University

Awards

Laboratory of the Year 2000, American Woodwork Award

The project includes biology, forestry, fire science, zoology, chemistry, geology, computer labs, geological museum, planetarium, plus a substantial nursing component. To best utilize space, the new addition was designed to accommodate the most heavily serviced laboratories, while the renovated areas generally include simpler classroom and lecture type uses.
