

EPOH

Sponsored by the World Bank, this project was won through a design competition amongst over 30 firms from USA, Britain, Japan & Canada. This project is unique as it translates northern laboratory building science and expertise to a tropical climate.

Malaysia Regional Laboratories

Kota Kinabalu, Kuching, Ipoh, Melaka MALAYSIA

Consultant	EPOH inc. + NYBA-A + PAB
Project Type	forensic and environmental laboratories
Project Size	80,000 sq. ft. each X four buildings
Project Cost	\$44 million (\$11 million each X four buildings)
Awards	World Bank Design Competition winner
Client	The World Bank

The purpose of these research facility is to provide health, medical, forensic and environmental testing facilities for the various states and their capitals. For efficiency, the Regional Laboratories are similarly structured to the Central Laboratory in Kuala Lumpur, although their function differs somewhat. All five buildings, plus three additional projects by this firm are linked through the Asian "multimedia Super Corridor" and housed at Multi-Media University, so that each building can easily communicate and share information and processes with any of their facilities throughout the country.
