

# EPOH

This building establishes a much needed architectural vocabulary for the entire campus. Both modern and natural materials were incorporated into the interior and exterior design. Located at the front door of the College, this building is iconic and will serve as a "Gateway" to the rest of the campus.

## Sault College Learning Commons Sault Ste. Marie

Consultant	EPOH inc. + ATRM
Scope	Architectural Mechanical and Electrical Services
Project Type	Post Secondary Teaching Facility
Project Size	78000 sq. ft.
Client	Sault College of Applied Sciences and Technology

This three storey project was delivered under a fast track process. The complex consisted of a "Northern Themed" Grand lobby, classrooms, lecture theatre, reception etc. The project was linked to the existing campus through a 3 storey "Link" facility providing the various levels of the existing campus. In addition 3000 SF of interactive learning commons is strategically placed throughout the building to provide much needed, flexible and dynamic learning environments. Organizing the classrooms around the "Commons" area emphasizes connectivity amongst the various forms of teaching and learning, creating a sense of community for the students.
